# INSTALL ISD181 SSL CERTIFICATE

Installation guide for Firefox browser devices

- The Firefox browser does not use the central certificate store and has its own.

- Visit cert.isd181.org from your device via the Firefox browser and download/save the certificate file to your system.
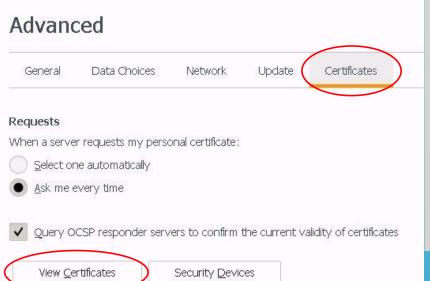

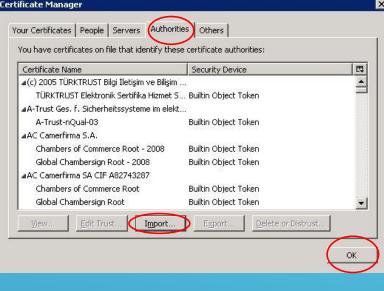

DOWNLOAD CERTIFICATE FILE

1. Download Certificate file and save it.
2. Go to "Options" in Firefox and "Advanced".
3. Select "Certificates".
4. Select "View Certificates".
5. Select "Import".
6. Browse to the location where you saved the certificate file and select it.
7. Check only the box "Trust this CA to identify websites." and then select "OK" to import and trust the certificate.

- Your Firefox browser now trusts the ISD181 certificate and you will no longer see any invalid certificate warnings when visiting SSL enabled websites.

THANK YOU FOR INSTALLING THE ISD181 SSL CERTIFICATE
